# 1. Training Course Information.

---

*“The Internet has drastically changed the way that children interact with the world. They have access to in-depth knowledge, tools to express their creativity, and people from all over the world. Yet along with offering a fascinating, new way to connect with the world, the Internet also offers new risks.”*

**Training Course: STRATEGIES FOR A SAFE INTERNET USE IN CLASSROOM**

**Course Code:** LC-----

**Program:** Digital School (Erasmus+).

**Venue:**

**Address:**

**Dates:**

**Duration:** 50 hours (7 days).

**Training fee covered:** 100%

**Special instructions:** 100% presence is required.

**Preliminary requirements:** Internet knowledge.

**Additional resources available:** computers, Internet connection, digital projector, speakers, tutors, online platform with supporting materials, papers, pens.

**Methods and schedule for evaluation:** This training course will follow a Non Formal methodology in every domain, in order to promote the interaction between students and trainers as well as between students themselves.

Different methods will be developed within the in-person sessions, giving special attention to the Case method and the Interrogative one.

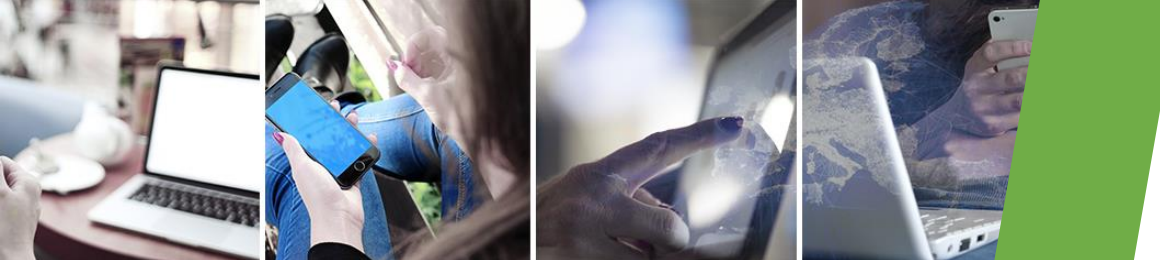

Moreover, students will work on the Inercia Digital’s online platform. It will be useful to download the learning and supporting materials, to participate in debate forums, to ask doubts, to interact with other students, to complete the required tasks for evaluation, and to do the final theoretical questionnaires. The students will have access to the online platform at any moment, 24/7.

In case you are dissatisfied with any aspect of our services or you would like to make any suggestion for improvements, please feel free to contact with Inercia Digital at the e-mail [training@inerciadigital.com](mailto:training@inerciadigital.com) to check our complaints procedure.

**Evaluation:**

- *Theoretical:* The wide theoretical knowledge will be evaluated at the end of the course with a questionnaire that will be done on the online platform. The theoretical evaluation is the 40% of the final mark and it is compulsory in order to pass the course.

- *Practice:* This training course is based on to the Continuous Assessment. Therefore, the students will participate on the debates and sessions planned. The participation and realization of the session’s tasks will be the 60% of the final mark and it’s compulsory in order to pass the course. The tutor will write every evaluation of the sessions on the online platform.

**Objectives of the Course:** The objective of the course is to familiarize teachers with the potential dangers that can be encountered in the virtual world as well as learning how to fight against those risks.

Specific objectives of the Course:

- Become aware of the risks of manage and share information on the Internet,
- Learn how to protect the data on the Internet,
- Become familiar with the different level of protection regarding the security on the Internet,
- Know how to set up a high protection to your data.

**Learning outcomes:**

- Participants will learn the different risks in management and sharing of information on the Internet and how to protect that info,
- Participants will learn the different types of network and wireless security,
- Participants will learn how to set up a high protection level of privacy for internet navigation,
- Participants will learn how to use and open Wi-Fi in a safety way,
